Veneering composite

Layering scheme for RED-WHITE individualization

Layering instructions - crea.lign GUM

1

The bone is represented with beige.

2

The effect of depth is achieved with lila.
Lila is spread from the mucolabial fold towards the teeth.

3

The layers that were previously applied are coated with pink.

4

The alveolar sockets are accentuated with rose.

5

Well perfused areas are accentuated with red.

Light is applied to the gingival margin.

6

The entire surface is sealed with transpa.
